LEGISLATIVE DAY 6 OF 40

Hello Partners! Welcome back to the *Night Owl* 🐠, your nightly recap of need-to-know information and intel on what's happening under the Gold Dome.

We're back for Legislative Day 6, returning from budget week and an unexpected snow-and-ice pause that briefly slowed things down across the state. With icy roads lingering, both the House and Senate gaveled in at 1 p.m. today, a reminder that even the Capitol has to yield to Georgia weather now and then.

Tomorrow brings a staggered restart, with the House convening at 11 a.m. and the Senate at 1 p.m., as lawmakers pick up where they left off and begin shifting from big-picture budget decisions to the policy debates that will define the weeks ahead.

We hope you enjoy *The Night Owl*. Please let us know if you have any suggestions for additional content!

U.S. data centers consumed 183 terawatt-hours (TWh) of electricity in 2024, according to IEA estimates. That works out to more than 4% of the country's total electricity consumption last year – and is roughly equivalent to the annual electricity demand of the entire nation of Pakistan. By 2030, this figure is projected to grow by 133% to 426 TWh.
